DRAWING SPEC: RR-STD-01 // RIDGELINE RESIDENCE JOINERY DETAIL

THE ACCUSTOM STANDARD

01

Written Line-Item Scopes · Zero Vague Allowances

Every project commences with an on-site structural walkthrough by AJ Maloney and an itemized written specification covering exact lumber dimensions, flashing membranes, fasteners, and clear sequencing before work starts.

02

Protected Finished Surfaces, Negative Air & Daily Reset

We treat occupied luxury residences with uncompromising discipline: continuous neoprene floor protection, isolated HEPA air barriers, and a mandatory end-of-day clean jobsite reset.

03

Building Science Substrate Verification & Principal Sign-Off

No finish material is installed over compromised framing or moisture-damaged sheathing. In-progress photo documentation and milestone walkthroughs are conducted directly with AJ Maloney before each construction phase advances.
